Abstracts of the papers presented at the scientific sessions of Cardiovilla 2011 (October 13-15, 2011, Villa Clara, Cuba) [CorSalud 2011; 3 (4): 224-302] – In one of the published abstracts, the authors and the institution were mistakenly changed. Dr. Alexander Santos Pérez, main author of “Preoperative factors associated with cardiovascular complications of coronary artery bypass surgery” requested correction.

The remaining authors are: Horacio Pérez López, MD; Amarilis Valero Hernández, MD; Liviam Lage López, MD and Yudmila R. Borges Moreno, MD; and the institution in charge of the research was the Dr. Faustino Pérez Hernández Medical University, in Sancti Spiritus. These changes have already been included in the electronic version of the journal, which, at that time, was published only in Spanish.
Pleuropulmonary blastoma extending to the left atrium [CorSalud 2014 Jul-Sep; 6(3): 257-258] – The authors of the article requested the journal to clarify that the patient's age at admission was 16 months (not 20 months) and that the surgery, carried out in two stages, was performed at the William Soler Hospital (which was not mentioned). These changes have already been included in the Spanish and English electronic versions of the journal.
